

Discover the Key Features

The CloudCreator portal makes it easy to deploy and manage your cloud services. Use the portal to take advantage of flexible self-service provisioning and reporting, and benefit from using CCL's managed in-country cloud platforms.

If you are migrating to Azure or AWS, CloudCreator makes it easy to manage your hybrid cloud, giving you a familiar “single pane of glass” view of your usage and billing. It also extends your existing homeland financial governance processes (e.g. cost centres) into the cloud.

Key Features:

- [Self-Service and Single Sign-On](#)
- ['Single Pane of Glass' View](#)
- [Usage/Billing Reports](#)
- [Access to Ticketing](#)
- [User Access Control](#)
- [User Support](#)

Self-Service and Single Sign-On

Use the CloudCreator portal to subscribe and on-board to CCL's Homeland services when you need them, for example:

- vCloud PAYG
- Silver-lining Protect
- Silver-lining Disaster Recovery
- Silver-lining Shield
- Fortinet Management
- Vault V2 (launching Q1 2021)

Once you've subscribed, take advantage of:

- Single sign-on access to the administrator portals for each Homeland Service.
- Access to the vCloud Director API for orchestration automation.

'Single Pane of Glass' View

The [Compute page](#) gives you a 'Single Pane of Glass' view of your hybrid cloud resources, including:

- Details of your Homeland, Azure and AWS resources.
- 7 hybrid-cloud, [resource-level categorisations](#) for governance and reporting e.g. Cost Centre, Environment, Project, Service Type.
- Hybrid-cloud operational features e.g. the Compute page and Automated Scheduling (launching Q1 2021).
- Click-through to the Homeland service administrator portals.

#	Service Type	Location	Status	Manage	Protect	Disaster Recovery	Shield
			Running Stopped Warning				
21	vCloud PAYG	PRT v2	1 20	MANAGE [E]	3/21	1/21	0/21
9	Managed VMware	PRT	6 2 1		3/9	0/9	0/9
5	vCloud PAYG	ART v2	4 1	MANAGE [E]	0/5	0/5	0/5
3	AWS (Offshore)	Asia Pacific (Mumbai)	3				
2	Managed VMware	ART	2		0/2	0/2	0/2
1	Oracle VM	PRT	1				
1	Azure Stack	wlg	1	MANAGE [E]	0/1		0/1
1	AWS (Offshore)	Asia Pacific (Singapore)	1

Usage/Billing Reports

Access detailed and summary usage and billing reports for your cloud services, including:

- Billing for Homeland, Azure and AWS services, professional services, etc.
- Historic and estimated 'full current month' billing. This allows you to compare 'apples with apples' and quickly spot increases in service consumption.
- **Extensive reporting** with Dashboard and List reports.

Access to Ticketing

Get live access to the CCL ticketing system. Quickly log and view your incidents and work orders.

User Access Control

CloudCreator's self-service functionality lets you quickly add users and give them access to your subscribed services including:

- Add/edit/remove CloudCreator users.
- Assign CloudCreator role(s) to your users to control their access to features.
- Use BYOAuth to allow staff to single sign-on to CloudCreator using your corporate credential system (launching Q2 2021).

User Support

Get started quickly, and learn as you go with CloudCreator's embedded Tool Tips and extensive [Online Help](#).

Event Explorer Dashboard

The Event Explorer dashboard lets you view and audit all the changes made by your users in CloudCreator.
