## Role Types in CloudCreator

There are four types of roles in CloudCreator. These are described below.

Role Type (click through to role details)	What the Role Controls	Who Can Assign Roles?
<a href="#">CloudCreator Administrator Roles</a>	<ul style="list-style-type: none"><li>• The screens you can view.</li><li>• The virtual cloud management functions you can perform in CloudCreator, e.g. Global Admin, Global Security Admin, Child Cloud User.</li></ul>	Users with the role of Global Admin can assign roles to users. Follow the steps here: <a href="#">Manage Users and Assign Roles</a> .
<a href="#">Onshore Cloud Service Roles</a>	<ul style="list-style-type: none"><li>• The functions you can perform within the onshore cloud services your organisation has subscribed to, e.g. Silver-lining Protect, VMware, Vault.</li></ul>	Users with the role of: <ul style="list-style-type: none"><li>• Global Admin can assign non-security roles.</li><li>• Global Security Admin (GSA) can assign security services roles. See <a href="#">CloudCreator Administrator Roles and Permissions</a> for GSA role details.</li></ul> Follow the steps here: <a href="#">Manage Users and Assign Roles</a> .
<a href="#">Offshore Cloud Service Roles</a>	<ul style="list-style-type: none"><li>• The functions you can perform within the offshore cloud services your organisation has subscribed to, e.g. AWS, Azure.</li></ul>	<b>Note:</b> Global Admin and Cloud Admin users do not need to assign specific roles to themselves. They automatically have administrative access to <b>all</b> the services their organisation is subscribed to.
<a href="#">General Cloud Service Roles</a>	<ul style="list-style-type: none"><li>• The general CloudCreator functions you can perform in CloudCreator, e.g. Billing, Reports, Service Desk.</li></ul>	

## Assigning Roles

Follow the steps here: [Manage Users and Assign Roles](#).

## Roles and Permissions Diagram

A high level diagram showing the relationship between the roles and permissions is shown below. For details of specific roles, read more here:
